

Liver Care Canada

Professional Health Care in Liver Disease

Liver Care Canada was founded in 2015 and has grown to be the ONLY major group providing advanced medical care to patients with LIVER DISEASE.

Our Team of Experts

Liver Care Canada clinics are situated throughout Ontario. Each site is staffed with expert physicians (MDs) with advanced training in hepatology, as well as qualified hepatology nurse practitioners and hepatology nurses.

On-Site Diagnosis and Treatment

Each of our clinics has access to state-of-the-art diagnostic equipment that is not readily available in most hospitals! The specialty trained physicians and nurses pride themselves in rapid and accurate assessments which lead to specific therapy for each patient's needs.

Curative therapy for Hepatitis C is readily available. New therapies for Hepatitis B, Fatty Liver Disease, Liver Cancer and PBC (Primary Biliary Cholangitis) are now easily accessible as well, typically on the same day of a clinical assessment!

Wait Times

Wait times are minimal! You can be seen and cared for in 1-4 weeks by one of our expert teams.

No referral is necessary! Make an appointment via our interactive website www.livercarecanada.com or call our central toll-free number 1-844-663-9011 for an appointment.
